

Check Data Extraction | Check Fraud Detection | Intelligent Document Automation

Capability Statement

COMPANY OVERVIEW

WesTech eSolutions is a Veteran Owned Small Business (VOSB) centrally located in Northern Colorado. We have over twenty years experience providing data capture solutions.

Whether you need simple scanning, conversion of legacy electronic formats, check data recognition, simple OCR, classification, capture of electronic data, capture of cursive handwriting, constrained and unconstrained handprint, signature verification, supporting hardware or software, training, consulting or full scale implementation. WesTech has the capability to provide it..

Our capabilities and experience makes us a one-stop shop for all your enterprise data capture needs.

TIME-SAVING FEATURES

- Process most documents in half the time compared to manual methods.
- Reduces the amount of human intervention required, which reduces human error
- Programming not required, setup/options managed by convenient Administrator's Dashboards
- Solution highly configurable, extendable and quickly implemented in days, not months.
- ◇ Completely Web-based, accessible from anywhere.

WesTech offers comprehensive solutions for check fraud detection, forms data extraction and signature verification.

eFraud Solution provides the ability to process machine-printed and handwritten business or personal checks. It offers the capability to combine any combination of modules including: check stock verification, check recognition and signature verification into one unified, easy-to-use solution without complex rules or add-ons.

FormXtra.AI Capture leads the market with a cost effective, highly secure, rapidly deployable solution that is built with the latest smart learning technology. It also features high levels of accuracy and reliability. Our solutions are available On-Premise and as a Cloud-Based solution.

Products and Services:

WesTech features industry leading data capture and recognition products from partners that lead the market for quality of their products and price performance.

Our eFraud Solution, is a unified software solution for check fraud detection, provides the ability to process business and personal checks for check stock verification, check data extraction and signature verification into one unified, easy-to-use solution. Spin off capabilities include Check Cashing Kiosk software and our latest product eFraud360, which provides the ability to extract data from a batch of checks and create a X9.37 compatible electronic deposit file to be transmitted to the bank for deposit. No more trips to the bank to deposit funds.

The alliance we have formed with Parascript LLC provides us access to their award winning products which enhance our ability to create efficient and cost effective solutions.
